

453.4 ADMINISTERING MEDICATIONS TO STUDENTS

Medications should be administered to school children by parents at home whenever possible. The school nurse and other designated persons may administer medications to students under established procedures. School personnel authorized to administer medications to students shall be provided with appropriate instruction.

Before any prescription medication may be administered to a student in the Wisconsin Rapids Public School District, proper procedures for administering medication to students must be followed. Non-prescription medications will be administered only with written parental instructions and consent. However, this policy shall not prohibit the older and reliable high school student from assuming responsibility for self-administration and storage of non-prescription products. Non-prescription medications may be carried or kept in the student locker in small quantities only. All medications must be in the original labeled container. Students are, under no circumstances, to administer any over-the-counter medications to other students.

Asthmatic students may possess/use asthma inhalers in accordance with state law and established procedures.

School employees, school volunteers and school bus drivers may administer epinephrine to any student who appears to be experiencing a severe allergic reaction, even in situations when written physician instructions and parent consent are not on file with the district authorizing such medication administration. Such action must be consistent with state law and established procedures.
