

Wisconsin Rapids DECA Hosts District Competition for the Seventeenth Year

For the seventeenth consecutive year, in early January Lincoln High School's Rapids DECA hosted the District II competition at Mid-State Technical College for over 520 high school students! Fourteen school districts were represented at this event.

Rapids DECA alone had over eighty students compete, and 40 earned an opportunity to compete at the State competition in March. In addition to the student competitors, over 90 business and industry professionals, parents, administration, school board members, alumni, post-secondary educators, and elected officials volunteered their time to help evaluate the students' performance, and assist in their skill development.

"The partnership between community business volunteers, the 14 participating high schools, and Mid-State Technical College is truly helping students become Academic and Career Ready," stated Eric Siler, WRPS Career & Technical Education Coordinator and DECA Co-Advisor.

We sincerely appreciate everyone's involvement!

Great Job!
