

## Community Members Enjoy Eclipse Viewing

In late August 2017, many individuals across North America took time out of their busy days to witness an eclipse of the sun. The District Science Department took the time to invite students, families, and interested community members for a viewing of this remarkable event. Telescopes with solar filters, pinhole viewers, eclipse glasses, and other projection methods to view the eclipse safely were used. It was a great experience, and one that won't be possible again until the next total solar eclipse in the year 2024!
