

MENTOR PROGRAM HELPS STUDENTS CONNECT

THINK Academy has recently developed a mentor program to help students succeed. Once a month each adult in the building including teachers, aides, secretaries, custodian, and guidance counselor spends approximately 45 minutes with a small group of students. The mentor and the students set goals, review goals, share stories, play games and make crafts together. Each group is made up of five to eight students.

The purpose of the program is to help each student have one more adult to connect with at THINK by building a relationship with a staff member who they feel comfortable around and can trust and turn to for guidance or help. The more the students feel connected to the building, the more successful they can be in school!

Students and staff members look forward to these mentor times, and it is difficult to know who has more fun – students or staff!
