

Middle School Students Perform Well in Math Contest

All 6th and 7th graders at the Wisconsin Rapids Area Middle School (WRAMS) recently participated in the Wisconsin Math League Contest. This annual contest consists of 35 - 40 problems (many of which are quite challenging), and students are given 30 minutes to solve them. Each year, the top 28 schools in the state are publicly recognized for their grade-level scores, and we are **proud to announce** that both grade levels at WRAMS made the list! In fact, our 6th graders placed 11th in the state - 4th in our region, and our 7th graders placed 4th in the state - 2nd in our region! Additionally, the following individual students were recognized for their outstanding performance: Skye Bignell, Jacob Coenen, Joseph Coenen, Tyler Gear, and Teal Lucas. The dedicated math teachers and hard-working students at WRAMS should be commended for this tremendous accomplishment!

Congratulations!
