

### Students Learn About Aquaponics

To celebrate Earth Day in April, THINK Academy welcomed Carl and Carol Flaig to the school to share their produce, which is grown on their aquaponics farm in Rudolph. The Flaigs set up an information table and displayed several photographs of their farm. The students were interested in learning how the produce was grown using water and fish nutrients. Wisconsin Rapids Mayor Zach Vruwink had lunch with students, and enjoyed a tour of the school. He, as well as two Americorps volunteers and our Director of Foodservice Lizzie Severson, were impressed with the raised gardens the students have been working on over the years!
