

Solar Eclipse Viewing

A solar eclipse will cover 80% of the sun on Monday, August 21. WRPS science staff will host students, families, and interested community members for a viewing event! Stop in to use telescopes with solar filters, pinhole viewers, eclipse glasses, and other projection methods to view the eclipse safely. Look for us between 11:30 a.m. and 2:45 p.m., near the south end of the Lincoln High School (1801 16th Street South) student parking lot, close to the entrance of South Wood County 2000 Field. Hope to see you there!
